

25: 8th_Science_Tides_StudentView

Student 1: these ones. Is it every five days they get a new pattern? 1, 2, 3, 4, 5, 6, ... and then it changes to this weird one. 1, 2, 3, 4, 5, 6, 7, ... 8?

Student 2: Wait. What is it?

Student 1: I don't know. Because look how ... see how these ones have lower bumps than these ones?

Student 3: The moon is at a wax- Is that a waxing crescent?

Student 4: Yes. I think.

Student 3: Because when it's at a waxing crescent, it gets lower. A waxing crescent ... a waning crescent. Oh! That's actually a good one. For the moon phases ...

Student 4: What do you mean when it's on a waxing crescent?

Student 3: The waxing crescent? ... It's waxing crescent and waxing gibbous ... is when the tides get higher.

Student 5: All of this sounds difficult.

Student 3: Does it look like the tides-

Student 4: [inaudible 00:01:13], yes?

Student 3: Yes.
