

Kindergarten Science Weather
Student

Teacher: Is it hot or cold?

Student: Cold.

Teacher: Cold, that's why it's all the way down there.

Student: Look at yours, cold.

Student: Let me get yours.

Teacher: While I was looking to see what everyone was doing, a lot of people knew what to do.

Teacher: We can stop drawing, just write the words first. So over here, what is this first word?

Student: A.

Teacher: A. A thermometer. So what two letters make that sound?

Student: T-h.

Teacher: T-h. T-h. Can you write t-h?

Student: Err. What makes the e-r sound?

Student: E-r.

Teacher: Err. Err.

Mm.

You're going to get a literacy award. Wow, good job today.

Err. Mm. Ahh.

Write ahh.

Teacher 2: So the water might make your ice melt.

Teacher: Mm. You're a little bit ahead of the [inaudible 00:02:04].

Mom. Mom. Err. Mom. Let's check it out.

Teacher 2: So you could take that to make it warmer, right here, or do you think it will get colder?

Student: Yes.

Teacher: And what two letters make the err sound?

Student: E-r.

Teacher: E-r.

Teacher 2: So maybe [inaudible 00:02:33] then, huh?

Student: How mine's gonna get down?

Teacher 2: You can make it go down. What can you do?
