

8: 3rd_Math_WordProb_StudentView

Speaker 1: What is this?

Speaker 2: Three times six.

Speaker 1: Equal what?

Speaker 2: I didn't finish that one because that was the one that are not ... All of these gumballs.

Speaker 1: It's how many bags.

Speaker 2: My bags is just [inaudible 00:00:15] bags.

Speaker 1: Let me see. How many small boxes were there? Oh you just do that. How many gumballs were ... I need to put all of it together so three, six, nine, twelve at the age of 20.

Speaker 2: Three times.

Speaker 1: No just to count it. One, two, three, four, five ...

Speaker 2: One, two, three, four, five, six, seven, eight, nine. Yeah, three times nine ...

Speaker 1: No it's just ... Yeah. Do that line.

Speaker 2: So it's three ... Check it, two, three, four, five, six, gumballs.

Speaker 1: Okay, [inaudible 00:01:02] you got to put like three groups of six right?

Speaker 2: I think it was nine, yeah nine.

Speaker 1: Oh, three groups of nine right?

Speaker 2: Yeah. One, two, three, four, five, six, seven, eight, nine. One, two, three, four, five, six, seven, eight, nine.

Speaker 1: [inaudible 00:01:35] right? Why don't you just do it like this. What is it, 94?

Speaker 2: Yeah.

Speaker 1: Nine is times three. Is it like this?

Speaker 2: Yeah.

Speaker 1: [inaudible 00:01:48] right?

Speaker 2: Yeah.

Speaker 1: Can we just put an equal?
